

How to uninstall Office 365 from Windows 7

Uninstalling Office 365 –After you deactivate your Software License in your office 365 profile, please proceed with uninstallation

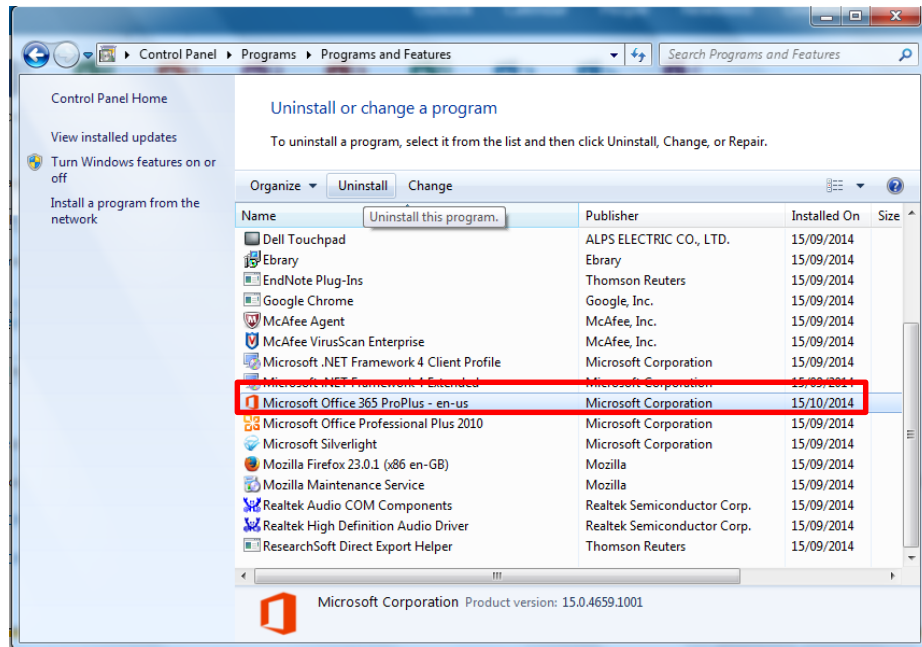

1. From the Start menu, you open up the Control Panel entry on right pane

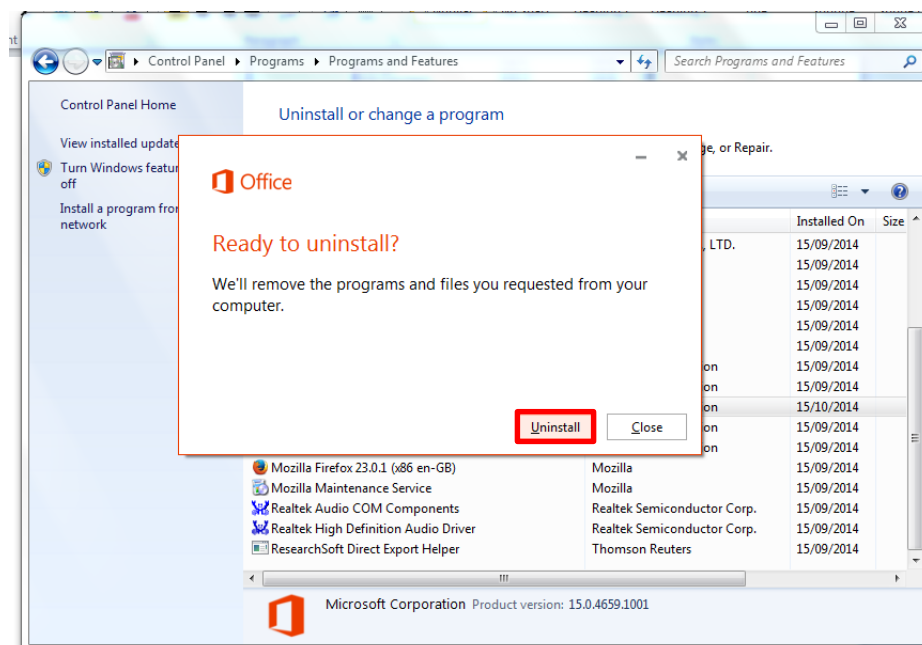

2. Click on the Uninstall a program under the Programs link.

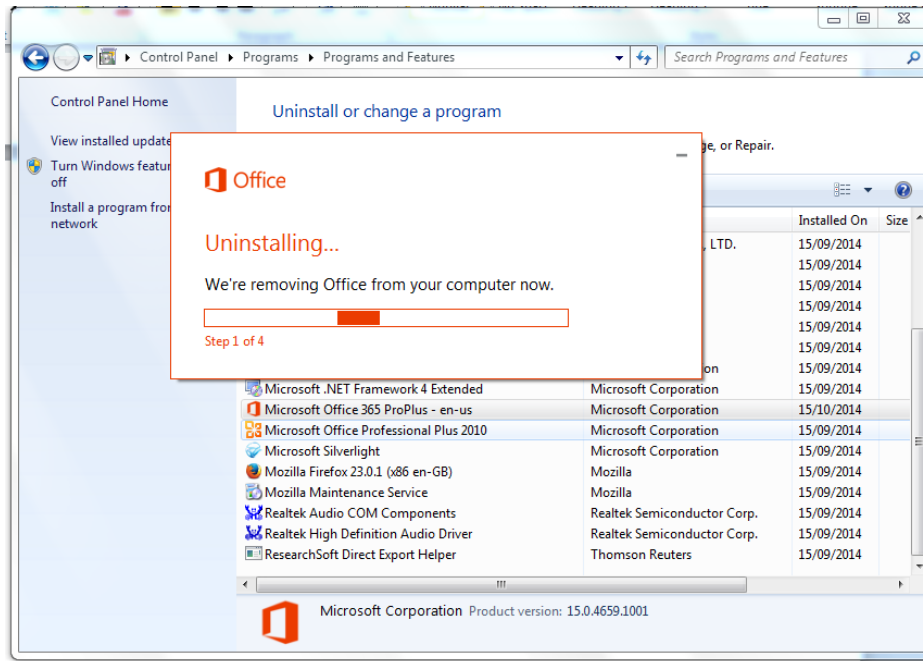

- Using any administrative account on your Windows, you locate and launch the "Microsoft Office 365 Premium Preview -en-us" program (Note: Product version, 15.0.4148.1014) from the "Uninstall or change a program" list.

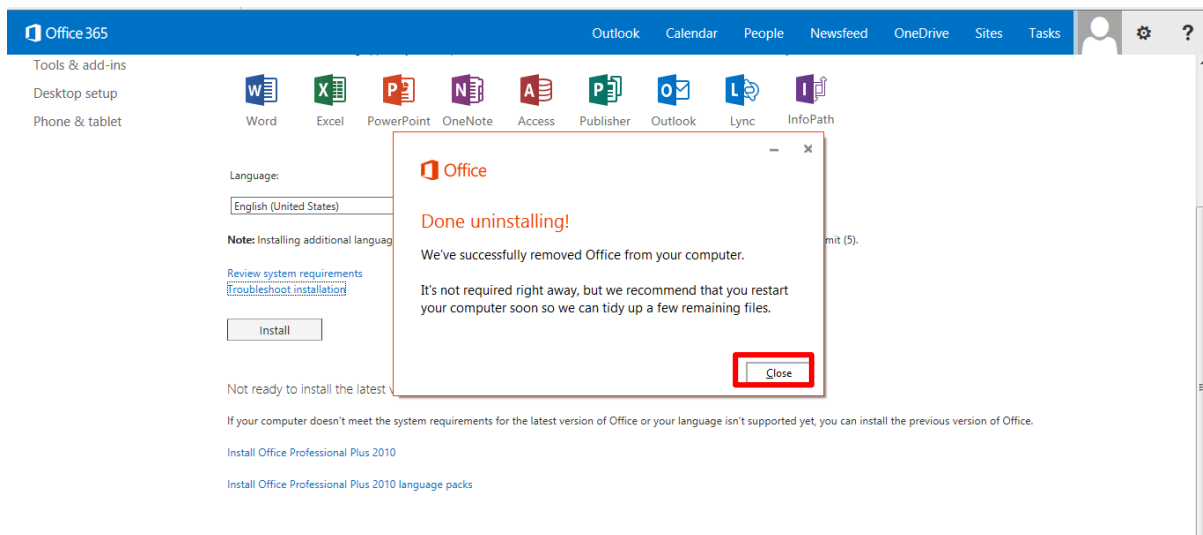

- Click the Uninstall button on the Office (Uninstall) window.

5. Please wait minutes for the automatic removal process to complete.

6. When complete The Done Uninstalling window appears, click **Close**.

If the above steps didn't remove Office 2013 or Office 365 please try the following

To automatically uninstall Microsoft Office 2013 or Office 365, click the Fix it button:

Important After you click the button, the **File Download** dialog box appears at the bottom of the Internet Explorer window. To download the Fix it, click **Save**. If you click **Open**, you may have problems when you run the Fix it. When the process is complete, click **Open folder**, locate the file (the file name should start as "O15CTRRemove"), and then double-click the file to run the Fix it.
